"Built on a hilltop in the heart of the Luberon Natural Park, this is a contemporary designer villa set in open countryside, with beautiful views over the surrounding fields, hills and village of Cadenet."

The modern architectural style and minimal furnishing of this elegant property makes use of glass panels, sliding doors and large windows to maximise the light and increase the sense of space. The garden has a large covered terrace, perfect for outdoor dining, where you can sit, relax and fully immerse yourself in the gentle Provencal ambience. Thanks to its superb location, this is an ideal base for your exploration of the region. In fact, this area offers plenty of opportunities for outdoor activities such as horse riding, fishing, hiking, cycling and archery. Avignon is further afield but its dramatic ramparts, fascinating Palais du Papes and artistic treasures certainly deserve a visit during your holiday in Provence.
